

Mult8 Candle Holder Dark Green

For years, De Vecchi has masterfully played with the form of silverware in a skilled way that provokes stories and emotions through its reflected images. More than just a decorative piece, this provocative candle holder unfolds into a fluid shape, playing into the hose-like material but instead of spewing water, either end holds exquisite fine silver cups and saucers. Impeccably reinterpreting the idea of a straight candlestick while still maintaining its functionality. Made in Italy, the silver plated and PVC piece pays homage to its original designer De Vecchi Milano first created in 1947. A true statement piece, center this double candlestick holder within a table setting as a conversational item.
