

J. Jungle Vase Gold Red

Making waves in the art world since 1997, Jacopo Foggini uses a unique technique to make a heat-shaped filament that he molds with his hands to create all original works of art. The Italian artist has created a recognizable signature of oversized monuments in luminous crystal shapes. The dramatically tall and shapely vase is made of colorful polycarbonate which captures light for a mesmerizing treat to the eyes. The single piece makes for an exquisite installation to your home that will demand admiration and conjure up joy, especially so when blooming with fresh buds.
